

	<h2>How is the Vaccine given</h2>
 	<p>The Vaccine is given by injection</p> <p>This is the only way to get the vaccine</p>
	<p>The injection is given in the top of your arm</p>
	<p>You will need 2 injections on different days</p>
<p>1</p>     	<h3>Injection 1</h3> <ul style="list-style-type: none"> • This helps your body to learn to fight the virus • The Vaccine does not start working straight away • It will start working about 2 weeks after the injection • This means you still might get very poorly with Coronavirus • It will not last for a long time

2

Injection 2

- Is given between **3 -12 weeks after** your first injection
- This gives your body **better help** to **fight** the **virus**
- It will **not stop** you from **catching Coronavirus**, but it will **stop** you from getting **very poorly**
